

ISO 22000 (Food Safety Management)

Overview

The ISO 22000 family of International Standards addresses food safety management. The consequences of unsafe food can be serious and ISO's food safety management standards help organizations identify and control food safety hazards. As many of today's food products repeatedly cross national boundaries, International Standards are needed to ensure the safety of the global food supply chain.

Benefits of ISO 22000

ISO 22000 can contribute to the quality of life in general by:

- ensuring safe food
- reducing foodborne diseases
- better quality and safer jobs in the food industry
- better utilization of resources
- more efficient validation and documentation of techniques, methods and procedures
- increased profits
- increased potential for economic growth and development

Who needs ISO 22000?

Since ISO 22000 is a generic food safety management standard it can be used by any organization directly or indirectly involved in the food chain including- Farms, Fisheries and Dairies, Processors of Meats, Fish and Feed, including Manufacturers of soups, snacks, bread, cereal, beverages, canned and frozen food, etc as well as food service providers such as restaurants, fast food chains, hospitals and hotels.

Supporting services should not be forgotten and providers of food transportation storage and distribution, catering services as well as product suppliers for equipment, additives, raw materials, cleaning and sanitizing products, packaging.
