

# ISO 50001 (Energy Management System)

## OVERVIEW

ISO 50001 replaces BS EN 16001 and is the international standard for Energy Management providing the most robust framework for optimizing energy efficiency in public and private sector organizations.

Certification to this standard demonstrates an organization's commitment to continual improvement in energy management, allowing them to lead by example within their respective industries and ensure related legislative and regulatory requirements are met.

## BENEFITS OF ISO 50001

ISO 50001 Benefits you organization to:

- Reduced operating costs.
- Improved energy efficiency.
- Reduced carbon footprint.
- Legal compliance.
- Proven business credentials.
- Ability to win more business.
- ESOS energy assessment compliance.

## WHO NEEDS ISO 50001?

Like all ISO management system standards, ISO 50001 has been designed for implementation by any organization, whatever its size or activities, whether in public or private sectors, regardless of its geographical location.

ISO 50001 does not fix targets for improving energy performance. This is up to the user organization, or to regulatory authorities. This means that any organization, regardless of its current mastery of energy management, can implement ISO 50001 to establish a baseline and then improve on this at a rhythm appropriate to its context and capacities.

## HOW KAYZED HELPS TO GET CERTIFIED?

Kayzed Consultants is one of the largest & leading business management consulting organizations offering business management consulting services to organizations of all nature and size.
